

National action tips for gas safety in the event of a disaster

※ In the event of a disaster during gas use

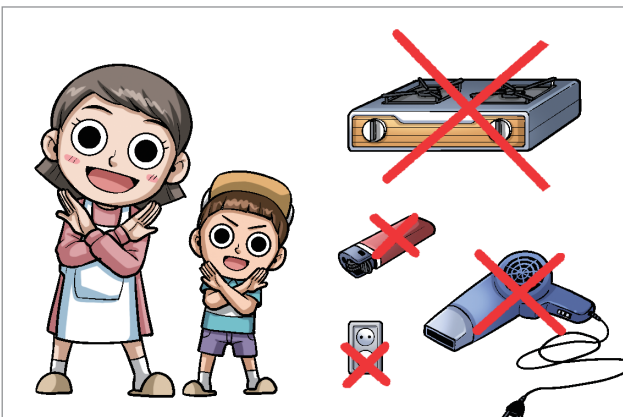

- ① Turn off the gas**
Lock the combustor cock and intermediate valve

- ② Lock the main valve**
For LNG : lock the valve attached to the gas meter
For LPG facility : lock the container valve

※ Gas safety measures in the event of a disaster

- ① Do not use electricity or firearm**
(gas stove, lighter, etc.)

- ② Indoors ventilation** (open windows, doors for enough ventilation)

- ③ Leak check** (check gas connection hose with soapy water)

- ④ Leak confirmation** [contact your gas supplier(city gas office).]
